

## **PRACTICAL:13**

**AIM:** Write a static block which will be executed before main( ) method in a class.

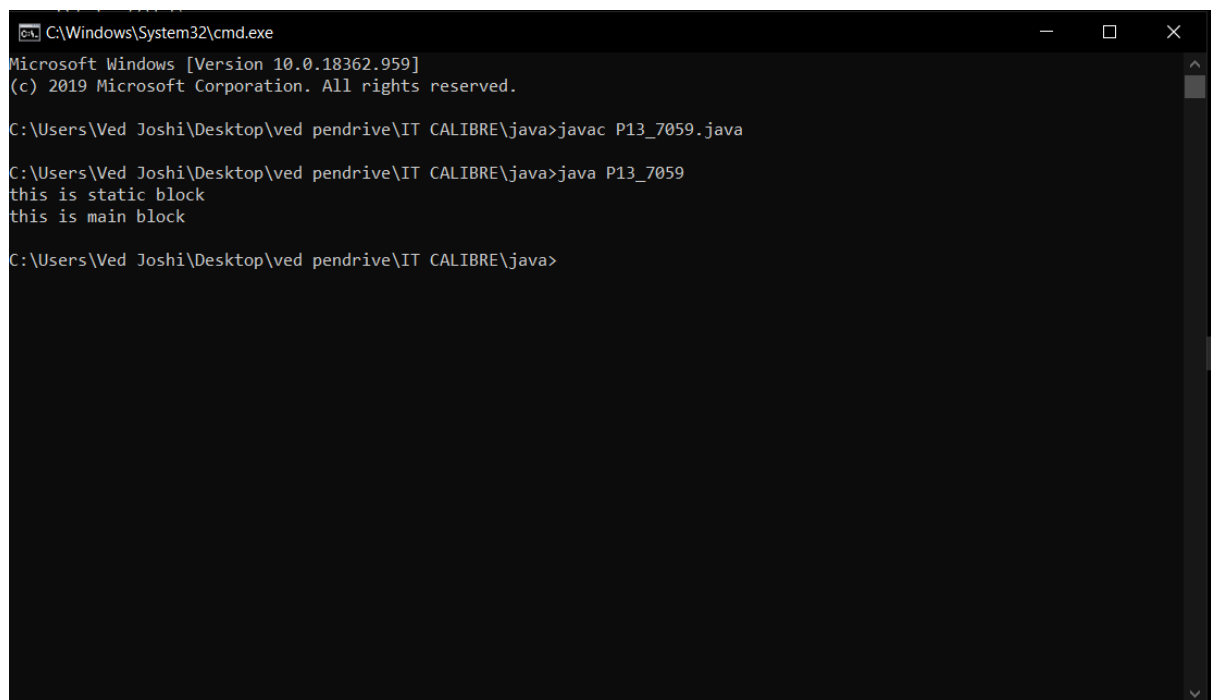

**STATIC:** It Is used to initialize the static data member.

It is executed before the main method at the time of class loading. See the example.

### **PROGRAM:**

```
class P13_7059
{
    static
    {
        System.out.println("this is static block");
    }
    public static void main(String[] args)
    {
        System.out.println("this is main block");
    }
}
```

### **OUTPUT:**

```
C:\Windows\System32\cmd.exe
Microsoft Windows [Version 10.0.18362.959]
(c) 2019 Microsoft Corporation. All rights reserved.

C:\Users\Ved Joshi\Desktop\ved pendrive\IT CALIBRE\java>javac P13_7059.java

C:\Users\Ved Joshi\Desktop\ved pendrive\IT CALIBRE\java>java P13_7059
this is static block
this is main block

C:\Users\Ved Joshi\Desktop\ved pendrive\IT CALIBRE\java>
```
